

## DC POWER PACK DISPOSAL

The DC Power Pack must be recycled or discarded according to applicable local, state, and national regulations. Unilux encourages owners of industrial equipment to responsibly recycle their equipment when it is no longer needed or has reached the end of its useful life.

In some areas it is illegal to place spent lithium-ion batteries in the trash or municipal solid waste stream. Return the spent DC Power Pack to an authorized recycling center or special waste collection point for proper disposal. Where necessary, the spent DC Power Pack can be returned freight prepaid to Unilux.
